IMPACT

UTV V-PLOW

You don't need a big truck to make a big impact. The new WESTERN® IMPACT™ UTV V-plow is a professional-grade snow plow designed to help you get the most out of your utility vehicle this winter. Built with the same high quality as all of our plows, this tough, compact plow easily adjusts to pass through gates and clear 5' sidewalks. Suited for a wide variety of models, the IMPACT UTV V-plow means you can now have year-round UTV fun and get your winter work done faster.

6' V-PLOW BLADE

6' powder-coated steel flared moldboard
 Standard 5" steel cutting edge for a clean scrape and extended wear
 5' wide or less when fully angled, in scoop or V mode to fit most sidewalks and maneuver through gates

STURDY V-PLOW CONSTRUCTION

Constructed with high-strength, low-weight alloy steel components that are both stronger and lighter than traditional steel
 Reinforced with six vertical ribs and our proven T-frame design so your UTV can work hard without having to carry extra weight

DOUBLE-ACTING CYLINDERS

Standard double-acting 1" angle cylinders allow you to operate each wing independently or to lock the wings together for efficient straight blade operation and clean back dragging.

TRIP-EDGE PROTECTION

The trip-edge design helps protect you and your equipment when encountering hidden obstacles. Since only the bottom edge trips, the blade stays upright and plowed snow remains in front of the blade.

UTV-SPECIFIC HAND-HELD CONTROL

The unique hand-held control allows the blade to be raised, lowered, angled or retracted with the push of a button. Joystick control also available for easy blade control operation when wearing gloves.

EASY ON/OFF

With the receiver brackets installed on your utility vehicle, either drive in or manually push the plow into the receivers. Release the hitch pin handle, plug in the electrical and activate FLOAT on the control. Push up on the lift frame to allow hitch pins to fully engage the hitch pin holes. Verify the lock pin is engaged in the forward hole in the lock pin bracket.

ACCESSORIES AVAILABLE

- Shoe Kit
- Deflector Kit
- Blade Wing Kit

Model	Blade Width	Blade Height	Blade Gauge	Trip Springs	Ribs	Lift Cylinder	Angling Rams	Plowing Width*	Approximate Weight**	Cutting Edge
IMPACT™ UTV V-PLOW	6' (1.83 m)	29¼" (74.29 cm) at end 25¾" (65.40 cm) at hinge	14 (1.90 mm)	2	6	1" x 6" (2.54 cm x 15.24 cm)	1" x 8¾" (2.54 cm x 22.23 cm)	5' 0" (1.52 m) full angle 4' 7" (1.39 m) scoop 5' 0" (1.52 m) full V	354 lb (160 kg)	1/4" x 5" (0.64 cm x 12.70 cm)
