KNAPHEIDE MECHANICS TRUCKS

Knapheide Mechanics Trucks come equipped with standard features to help you get the job done. With secure side compartments and an oversized cargo space, you can carry everything you need.

Choose a Knapheide Mechanics Truck for the durability and functionality that stands above the rest.

GM chassis are compatible with KMS16 Mechanics Truck models.

KMS16

Knapheide KMS16 Mechanics Trucks are compatible with class 3–5 trucks.

KMS16

*Body may be shown with optional features

STANDARD FEATURES

- A** Full length torsion box subframe
- B** Reinforced rear vertical curb side compartment reduces flexing and twisting of side packs
- C** Double paneled doors made of 20 ga. galvanized steel are reinforced with internal braces for durability
- D** Vertical compartment doors employ double spring-loaded, over center retainers for elimination of involuntary swing
- E** Thick automotive bulb-type neoprene door seals protect your compartments from the outside elements
- F** Refined, automotive quality, paddle activated, rotary style latches make opening and closing easy. Low maintenance and stylish, the latches are covered under Knapheide's six year warranty.
- G** All stainless steel continuous hinges for unmatched security
- H** Master Locking System locks down all compartments on one side with one motion for an extra layer of security
- I** Knapliner work surface bumper (Knapliner not pictured in above photo. Optional tread plate bumper shown.)
- J** Two heavy duty aluminum grab handles installed on both sides at rear of the body for easy cargo area access
- K** Recessed LED S/T/T and B/U light located at the rear of the body
- L** Double panel slam tailgate with center latch
- M** Knapliner applied to cargo floor, sides, compartment tops, bulkhead, bumper and tailgate for durability
- N** Adjustable divider shelves with a 250lb. maximum load capacity for increased organization
- O** Welded on cab protector with fully punched window for visibility
- P** Two LED work lights installed for improved working conditions in low light conditions (recessed in bulkhead, one on each side)
- Q** One manual outrigger for crane stability during lifting operations
- R** Up to 16,000 ft-lb. crane with 20' reach
- S** Planetary winch provides a 15 ft. per minute single line speed
- T** Double boom design makes crane nearly twice as strong as the nearest competitor

Other features, not pictured:

- Aluminum mechanic 7-drawer set
- Sortimo part storage containers in street side second vertical compartment
- 6 cargo tie downs installed in the cargo area with a 2,000 lb. maximum capacity
- Floor is comprised of 1/8" tread plate
- Compartment tops, backs, floors & end panels comprised of 14 ga. galvanized steel
- Bodies are fully protected with Knapheide's water-based undercoating
- Complete immersion in Knapheide's electrodeposition prime paint system for superior corrosion protection

COMMITMENT TO CORROSION RESISTANCE

Corrosion shouldn't be a concern when you buy quality Knapheide products. To give you the best protection from corrosion, we installed our state-of-the-art, custom-designed electrodeposition prime paint system. Our E-coat system bonds prime paint to steel by an electroplating process, to give you a superior coat of primer resulting in better corrosion protection compared to spraying methods. Complete immersion in our E-coat results in a prime coat that provides the best chemical and solvent resistance.

Because of our commitment to corrosion resistance, you should never worry about the quality of your Knapheide products.

- No Rust Through
- Free from Defects in Workmanship
- Free from Defects in Materials
