

**HTS**TM

See our separate full-line snowplow and spreader catalogs for the complete WESTERN snow and ice control lineup.

Blade Width	7'6"
Blade Height	27"
Blade Gauge	14
Trip Springs	2
Vertical Ribs	6 plus Power Bar
Angling Rams	1½" x 8"
Plowing Width (full angle)	6'7"
Approx Weight (less mount)	412 lb.
Cutting Edge	5/16"

TWO WINTER  WARRANTY

Half-Ton Snowplow

Until now, snowplowers with half-ton pickup trucks have had to compromise when choosing a snowplow — their vehicles won't handle a full-size commercial plow, but the lightweight plow offerings didn't meet their plowing needs.

With the WESTERN HTS™ snowplow, you no longer need to sacrifice. It's a full-size, full-featured snowplow designed exclusively for today's lighter half-ton, four-wheel-drive trucks.

It handles both personal and light commercial applications, providing rugged, pro-like performance without the extra weight.

NIGHTHAWK™ halogen headlamps feature state-of-the-art reflector optics that illuminate the entire plowing area with a smooth, wide beam pattern.

Vented light bar permits additional air flow to the radiator.

The exclusive WESTERN **Security Guard** Anti-Theft System is a safe and secure way to electronically "lock" your snowplow while it is detached from the truck, providing a deterrent from theft or non-permitted use.

Unlike physical locks that can be easily cut or removed, the Security Guard Anti-Theft System electronically synchronizes your control and plow module. When activated, it disables the electronic control system and renders the plow inoperable to unauthorized users.

Control options include a hand-held or joystick control; each provides precise blade control.

ULTRAFINISH™ baked-on powder coat – the industry's best protection against wear and rust is now even better. We've added a new epoxy primer to further enhance powder coat adhesion and improve corrosion resistance.

Covered hydraulic system is protected from the elements.

The two-spring trip blade protects your plow and truck when the plow strikes an obstruction. Elastomer trip pads further reduce excessive jarring and soften the blade return when tripping occurs.

Six vertical ribs and the exclusive WESTERN POWER BAR provide unmatched structural reinforcement.

One-side hookup. The simplified UltraMount® mounting system is fast and easy. Simply drive into position, letting the flared receiver brackets guide the plow into place, rotate the handle to connect the plow, plug in the electrical connectors, and you're ready to go. The HTS snowplow uses existing UltraMount vehicle mounts.

Hydraulic Scrape Lock – hydraulically locks the blade down for enhanced scraping and clean back-dragging performance

14-gauge Steel Moldboard

75-degree Attack Angle – most aggressive of any plow in its class

15½-inch Curl Radius – enhanced snow rolling action for maximum plowing efficiency

Exclusive WESTERN POWER BAR delivers superior torsional strength, supporting the area of the plow where it's needed most.

OPTIONAL ACCESSORIES

- Snow Deflector
- 3/8" Cutting Edge
- Steel Shoes
- 1/2" Cutting Edge
- Curb Guards
- Back Drag Edge
